# Alu-View Aluminium & Glass Garage Doors

Ideal for creating an architectural focal point or feature on premium buildings, these striking and modern garage doors are the perfect mix of glass and aluminium. They can be manufactured into a variety of design options and are ideal for applications where protection is needed without obscuring the view.

## Features

- Alu-View Aluminium doors are manufactured from robust maintenance-free extruded aluminium and 6,38mm laminated glass that is available in a wide range of finishes.
- Aluminium is a flexible, high-strength, corrosion-resistant material; making it an ideal option for this modern, long-lasting, low maintenance door.
- The aluminium profiles are framed together with matching mullions and pressure locking internal glazing beads.
- The side mullions are bolted for additional strength.
- The glass may be replaced with aluminium infill panels. Infill panels can be solid or punched, to create an attractive ventilated door.

These doors are available in 4 standard colours: white, black, charcoal and bronze. Doors can also be powder coated with a wide range of standard or special colours to match any building or home perfectly.

## Benefits

- Superior quality and durability
- Low maintenance
- Laminated glass safety features
- Quality hardware
- Smooth and quiet operation
- Optional ventilation customisation available
- Versatile sizes, glass types and colours available
